NOMA[®] ROOM INSULATION

Smart insulation, clever savings

People have always had a need for warmth and security. This is why fire and shelter meant survival for our ancestors. Today, in a time of scarcity of resources, hectic lifestyles and anonymity, we feel like a raw wind is blowing against us every day. The longing to be protected and snug is stronger than ever.

The future of the earth, and therefore humanity, basically depends on how prudently we use the remaining energy sources and what innovations are implemented in the area of energy production and use. Use of environmentally sound, energy-efficient building materials makes an important contribution to this. Intelligent materials and their environmentally sound production have the goal of dramatically extending the energy life cycle. In this way the world will continue to be habitable for us and our children.

For the past half-century, we at NMC have persistently sought to make our customers feel good with innovative products and highly developed technology. Our core skill lies in the development, production and international marketing of technical foams.

Our home is an island in the current of everyday routine and a place of relaxation. But to achieve that sense of wellbeing, the atmosphere has to be just right. This is where our versatile NOMA® room insulation provides clear benefits: With our insulated wall coverings for savings in heating costs, heat/cold sheet shields for isolating cold and heated areas, sound proofing foam sheets and rolls and non-slip and anti-vibration mats, we provide for your safety and peace and quiet throughout the home. So discreet and inconspicuous that you'll start to take that all-round sense of wellbeing for granted. NOMA® room insulation – for the difference to living that you can feel.

NOMA®TAP

NOMA®THERM

NOMA®REFLEX PS

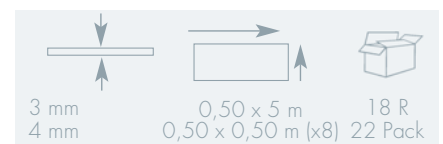

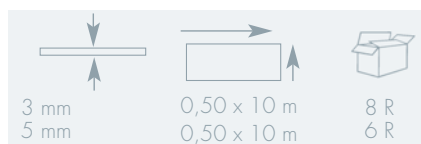

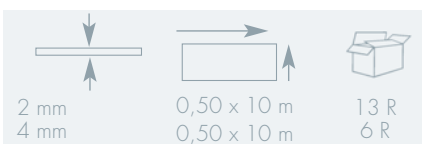

Polystyrene underlay for thermal insulation all around the house.

Polystyrene insulating layer with pasted lined board for thermal insulation. Reduces heating costs and eases the application of wall-coverings.

Insulating and heat-reflecting foil for radiators. Reflects heat back to the room and stops energy loss, reduces heating costs.

NOMA®REFLEX PU

NOMA®ALU

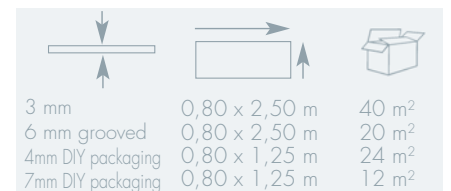

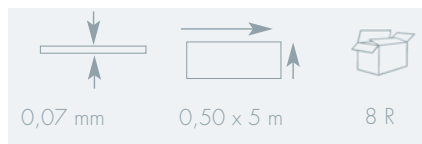

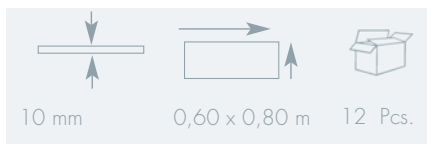

NOMA®PLAN

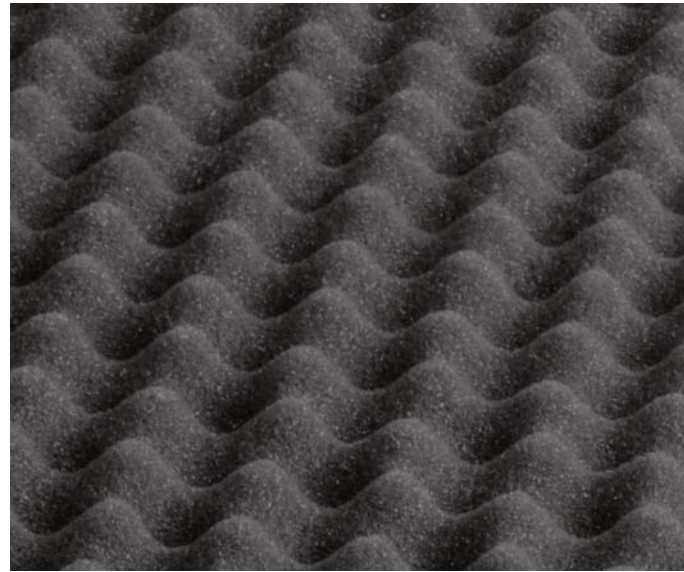

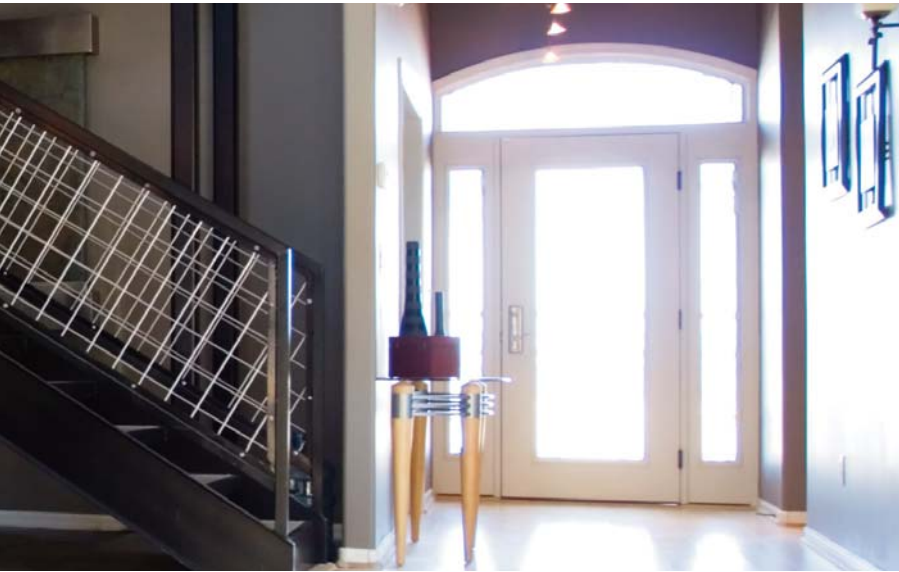

Insulating and reflecting layer. Saves energy and creates a barrier between hot and cold elements (oven, refrigerator...). PU insulating panel, double-sided aluminium laminate, high thermal resistance up to +110°C.

Aluminium-foil, paper laminated. Protects interior walls against humidity. May be papered.

Polystyrene insulating tile for interior walls. Insulates against cold and heat. Highly heat-insulating, pressure-resistant surface.

NOMA®ACOUSTIC

NOMA®PHONE

NOMA®NATURE

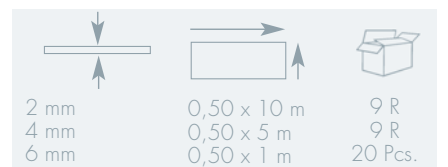

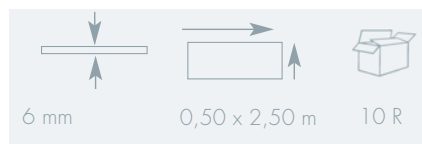

Noise-absorbing foam-layer + packaging protection. Easy to cut and install anywhere.

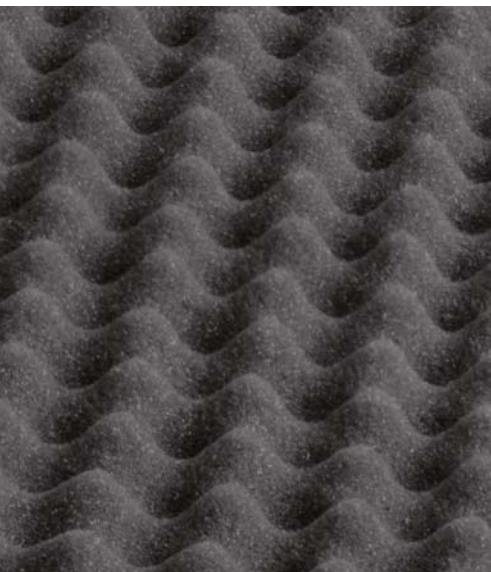

Sound-absorbing, thermal wall insulation. Reduces high-frequencies and protects against humidity.

Cork insulation, protects against noise and cold temperatures. For wall and floor insulation, 100% natural and fully recyclable.

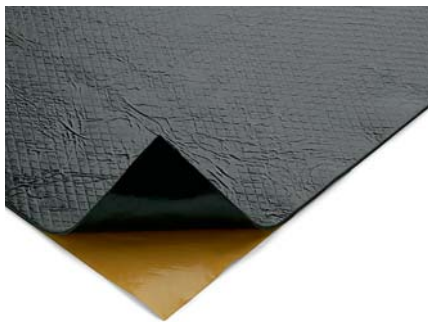

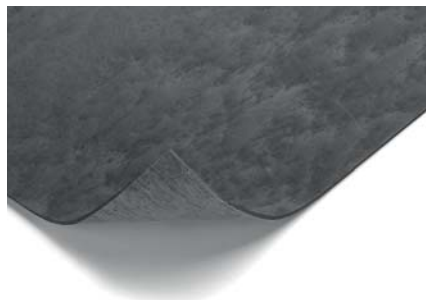

NOMA®SOUND

NOMA®SILENCE

NOMA®RUB

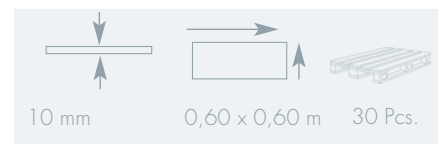

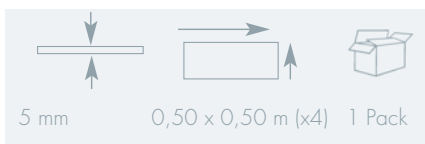

Self-adhesive soundabsorbing insulation.
Efficient and easy to install.

Sound absorbing panel.
Reduces the unpleasant effects of resonance and vibration.

Anti-vibration tile. Easily absorbs the vibrations generated by machines (washer, drier...) and very effective as an under floor-covering.

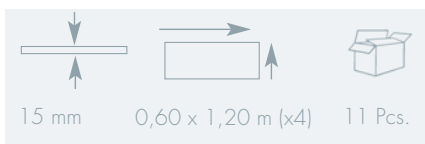

NOMA®FIBRE

Natural and ecological insulating sheet based on wood fibre for an application to the wall and the floor.

NOMA®FILL

Air- and water resistant polyethylene backer rod for filling up joints between walls and door or window frames.

NMC

Protection, beauty and pleasure

NOMA®PARKETT Floor insulation

It's what's underneath that matters

- Underlayers for parquet, cork and laminate floors

DECOFLAIR®

Interior decoration:

- Mouldings
- Ceiling Centres
- Chair-rails and baseboards
- Bases for door surrounds

NOMA® pipe insulation

360 degrees of innovation

- Technical insulation
