

## POP-ART STYLE

Stucco designs on the ceiling and a jazzy cushion on the sofa. Pop-Art and champagne. Can they really be mixed and matched? Yes! They can be teamed together here, in bold yet clear combinations to make you feel right at home. And whether it's a classic from the Beatles or Take That coming out of the speakers – life can be remixed differently every day.

So: why not get those creative juices flowing and build some happiness. After all, the best way to get a fresh perspective on things is to move around a bit.

To put it another way: sometimes you need to be standing in the garden to come up with new ideas for the kitchen.
